November 2022 - Present

Springboard

Software Engineering Boot camp

2018 - 2022

Bachelor of Business Administration,

Major: Business Analytics

Auburn University, AL

About Me

From the moment I printed "Hello World" I became hooked on Front End Development. Front End Development provides an opportunity to create quality user experiences and web applications. I found a passion in utilizing JavaScript to implement logic to a computer and styling with CSS.

Experience

Bob's Burgers Project

The Bob's Burger Website

This website allows the user to be able to discover information about various characters from Bob's Burgers t.v show. The technology used in this project are HTML, CSS, and JavaScript.

<https://github.com/Andr3wDawson/Bobs-Burgers>

Pokémon Project

The Pokémon project

Allows the user to choose and learn about any Pokémon. When the user makes a selection, a custom background is displayed. The technologies used are HTML, CSS, and JavaScript. The website is gaining the images and data from the Poke application programming interface.

Professional Experience

Reconciliation Specialist

Hancock Whitney Bank,

Montgomery, AL December 2021 – Present

Analyzes general ledger balances monthly to ascertain correctness of balances and communicates necessary adjustments to appropriate department personnel. Trains personnel on General Ledger and Reconciliation duties. Initiates and tracks resolution of exceptions to Branch Bank account, and performs research as required.
